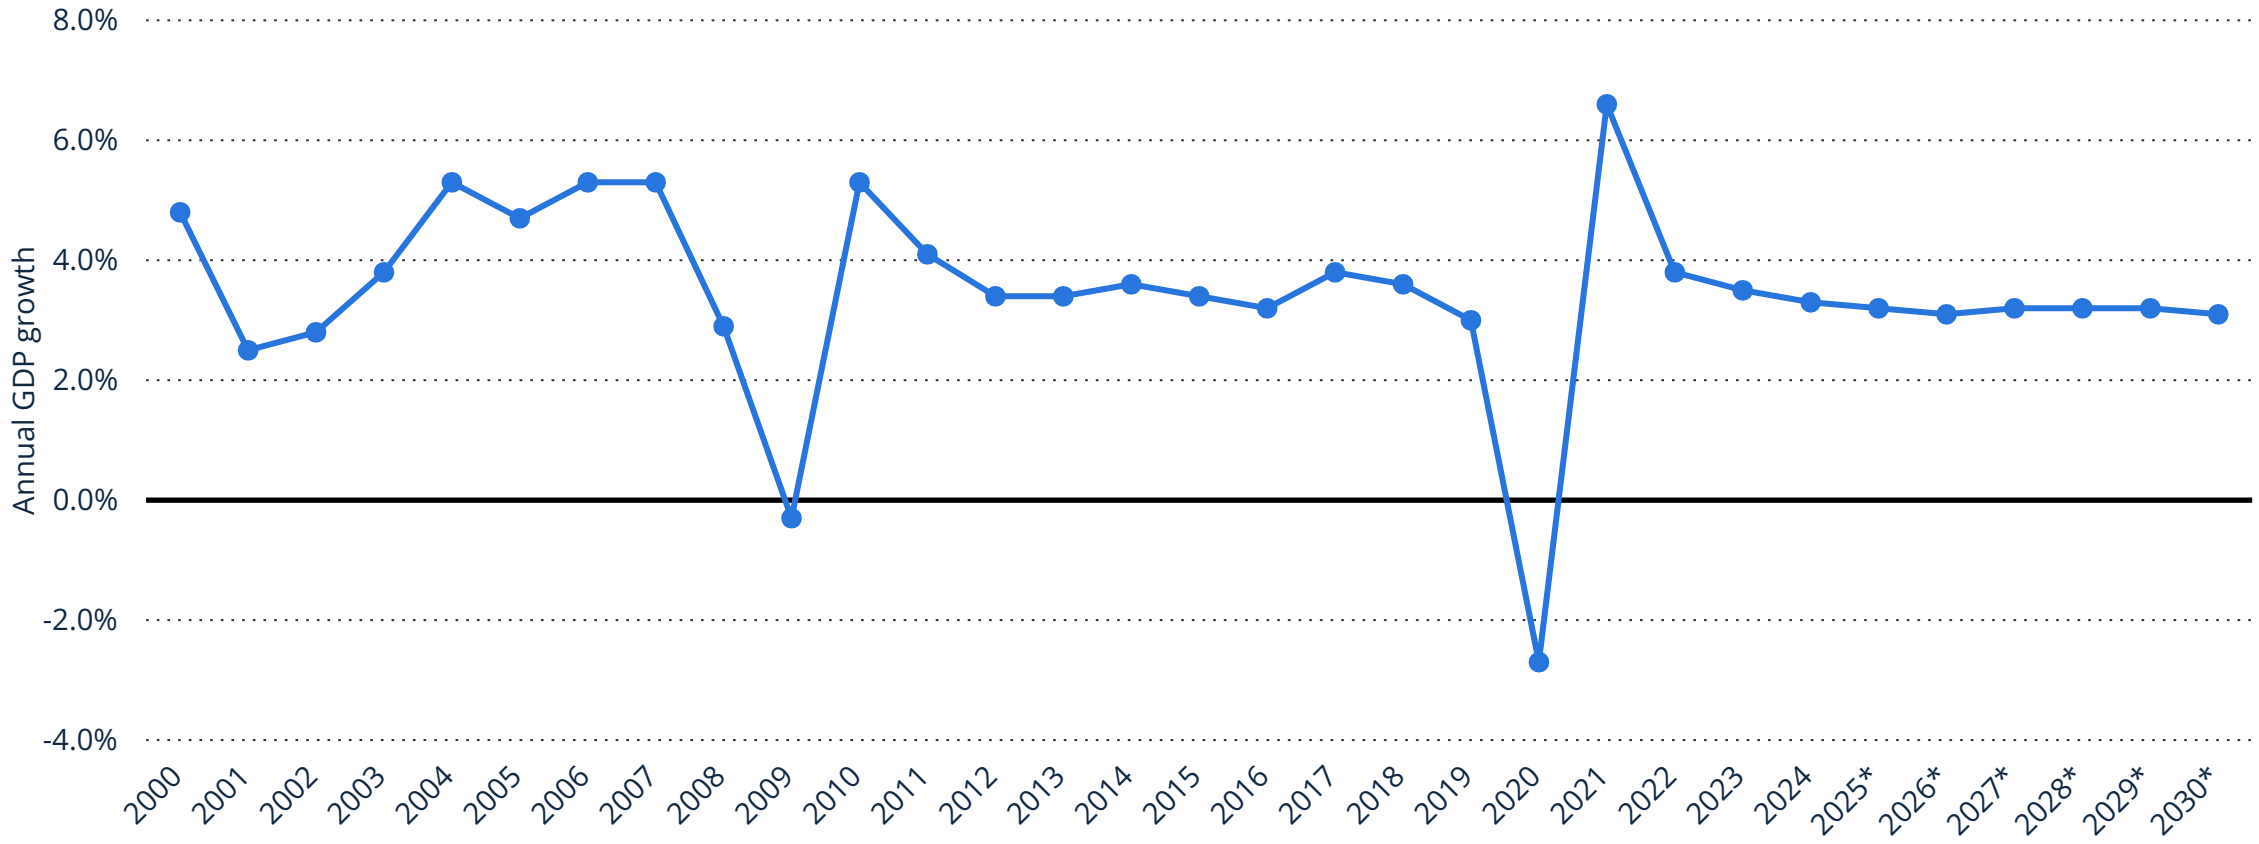
CHAPTER 01

Indicators of real activity

Annual growth of global gross domestic product (GDP) from 2000 to 2030

Global GDP growth 2000-2030



Description: In 2025, the global economy was estimated to have grown by approximately 3.2 percent, compared with 3.3 percent in 2024. In most years since 2000, global gross domestic product has increased. Notable exceptions to this include the Great Recession in 2009, and again in 2020 during the COVID-19 pandemic, when the global economy shrank. Read more

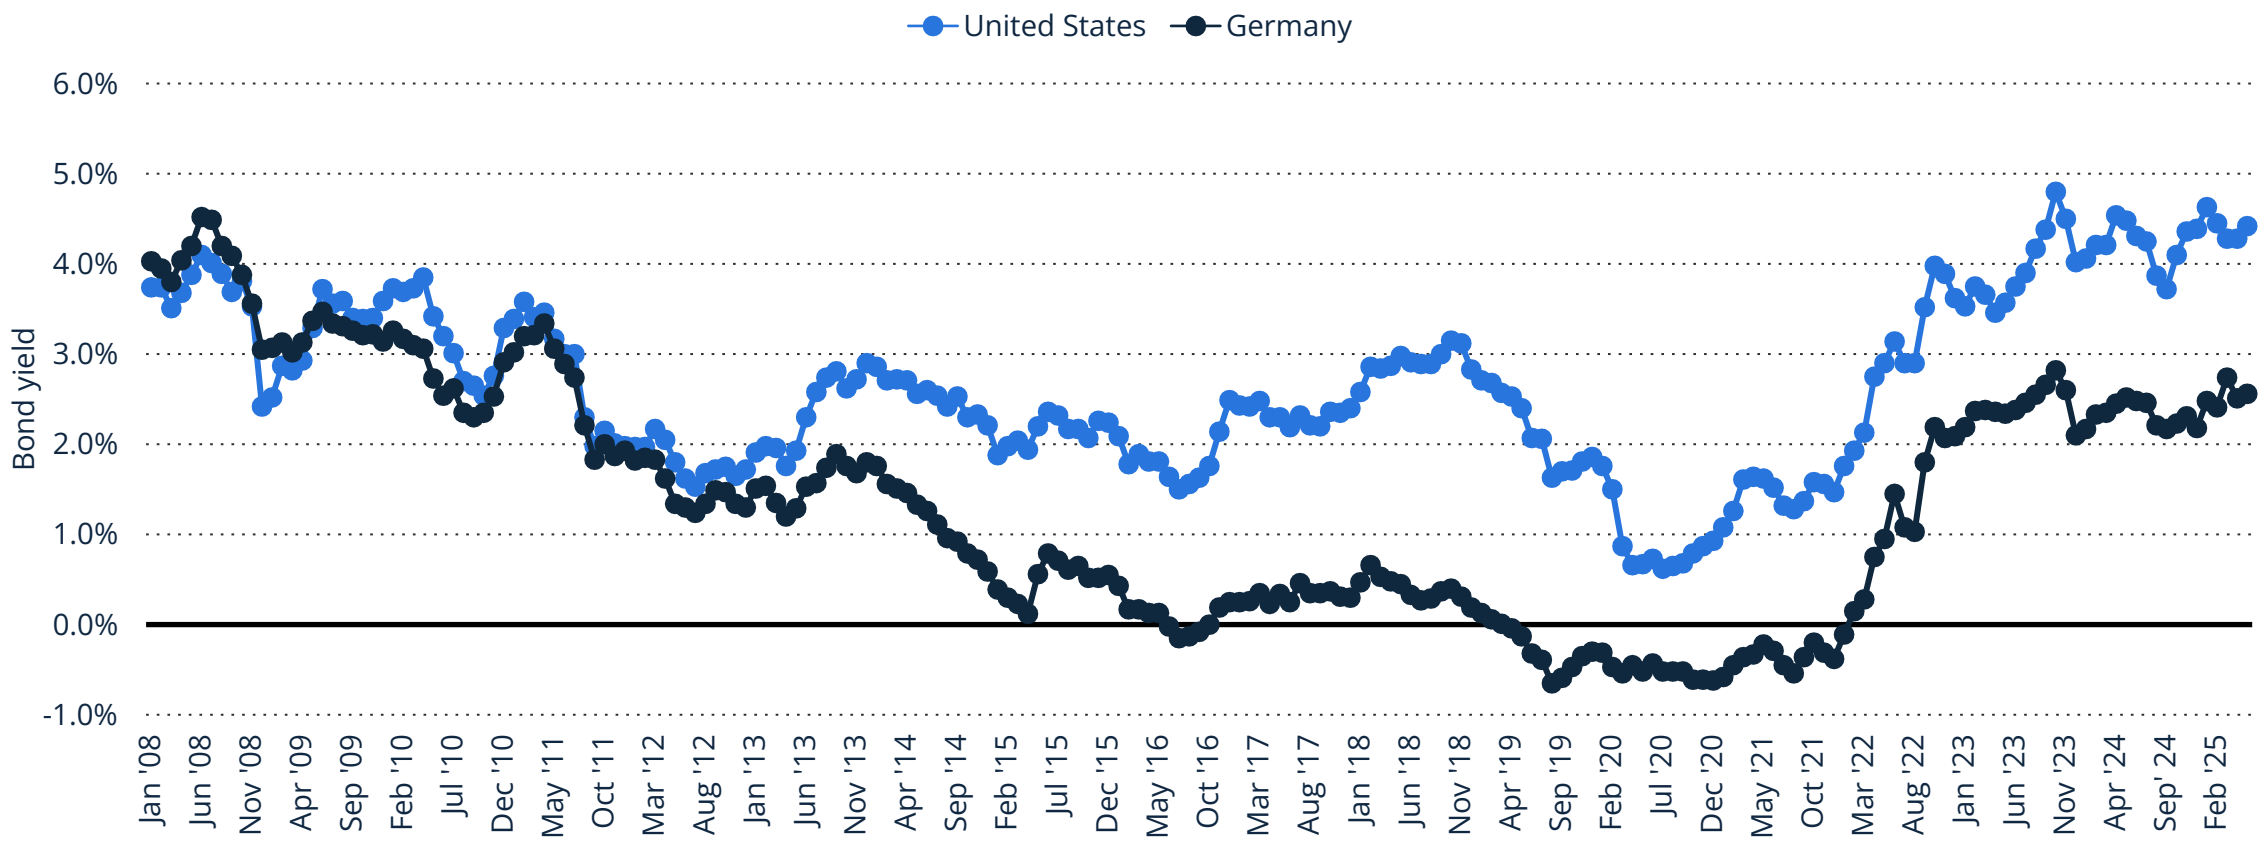
Money and capital markets

Ten-year government bonds yields from Germany and the United States between January 2008 and May 2025

Germany and U.S. 10-year government bonds yields 2008-2025



Description: U.S. ten-year government bonds have provided significantly higher yields compared to German ten-year bonds since 2008, with the former yielding 4.42 percent in May 2025 compared to 2.56 percent for the latter. Being safe but low-return investments, treasury bond yields are generally considered an indicator of investor confidence about the economy. A rising yield indicates falling rates and falling demand, meaning that investors prefer to invest in higher-risk, higher-reward [...] Read more
