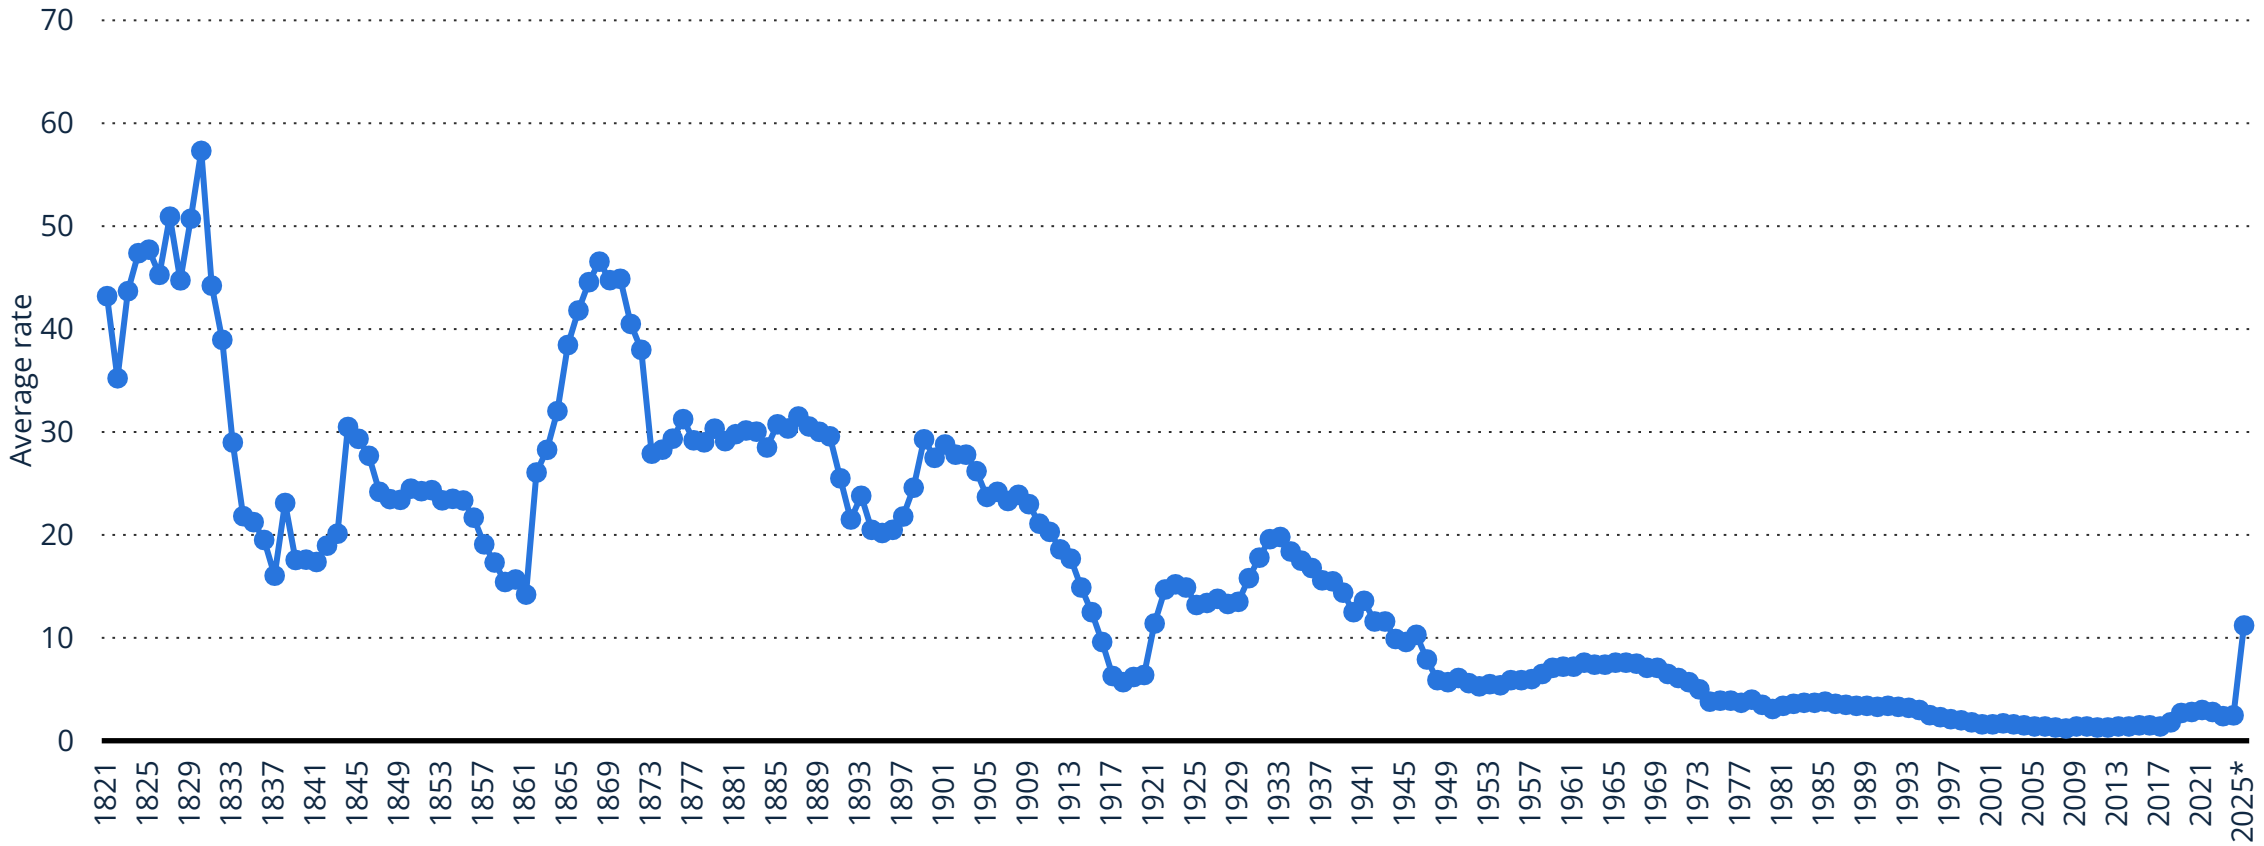
CHAPTER 01

Overview

Average effective tariff rate on all imports in the United States from 1821 to 2025, with estimated rate for 2025 under Trump's imposed tariff

Average actual tariff rate on all imports to the U.S. 1821-2025



Description: Newly imposed import tariffs in the United States were estimated to reach an average effective rate of 11.2 percent in 2025. Earlier that year, President Trump imposed tariffs on various goods and trading partners such as China, Canada, and Mexico. This was a considerable increase from the average tariff rate of 2.48 in 2024. Read more

Note(s): United States; 1821 to 2025; * Estimated rate under newly imposed tariffs. The average effective tariff rate of all imports is calculated by dividing the total tariff revenue by total imports, including duty-free and dutiable imports. Read more

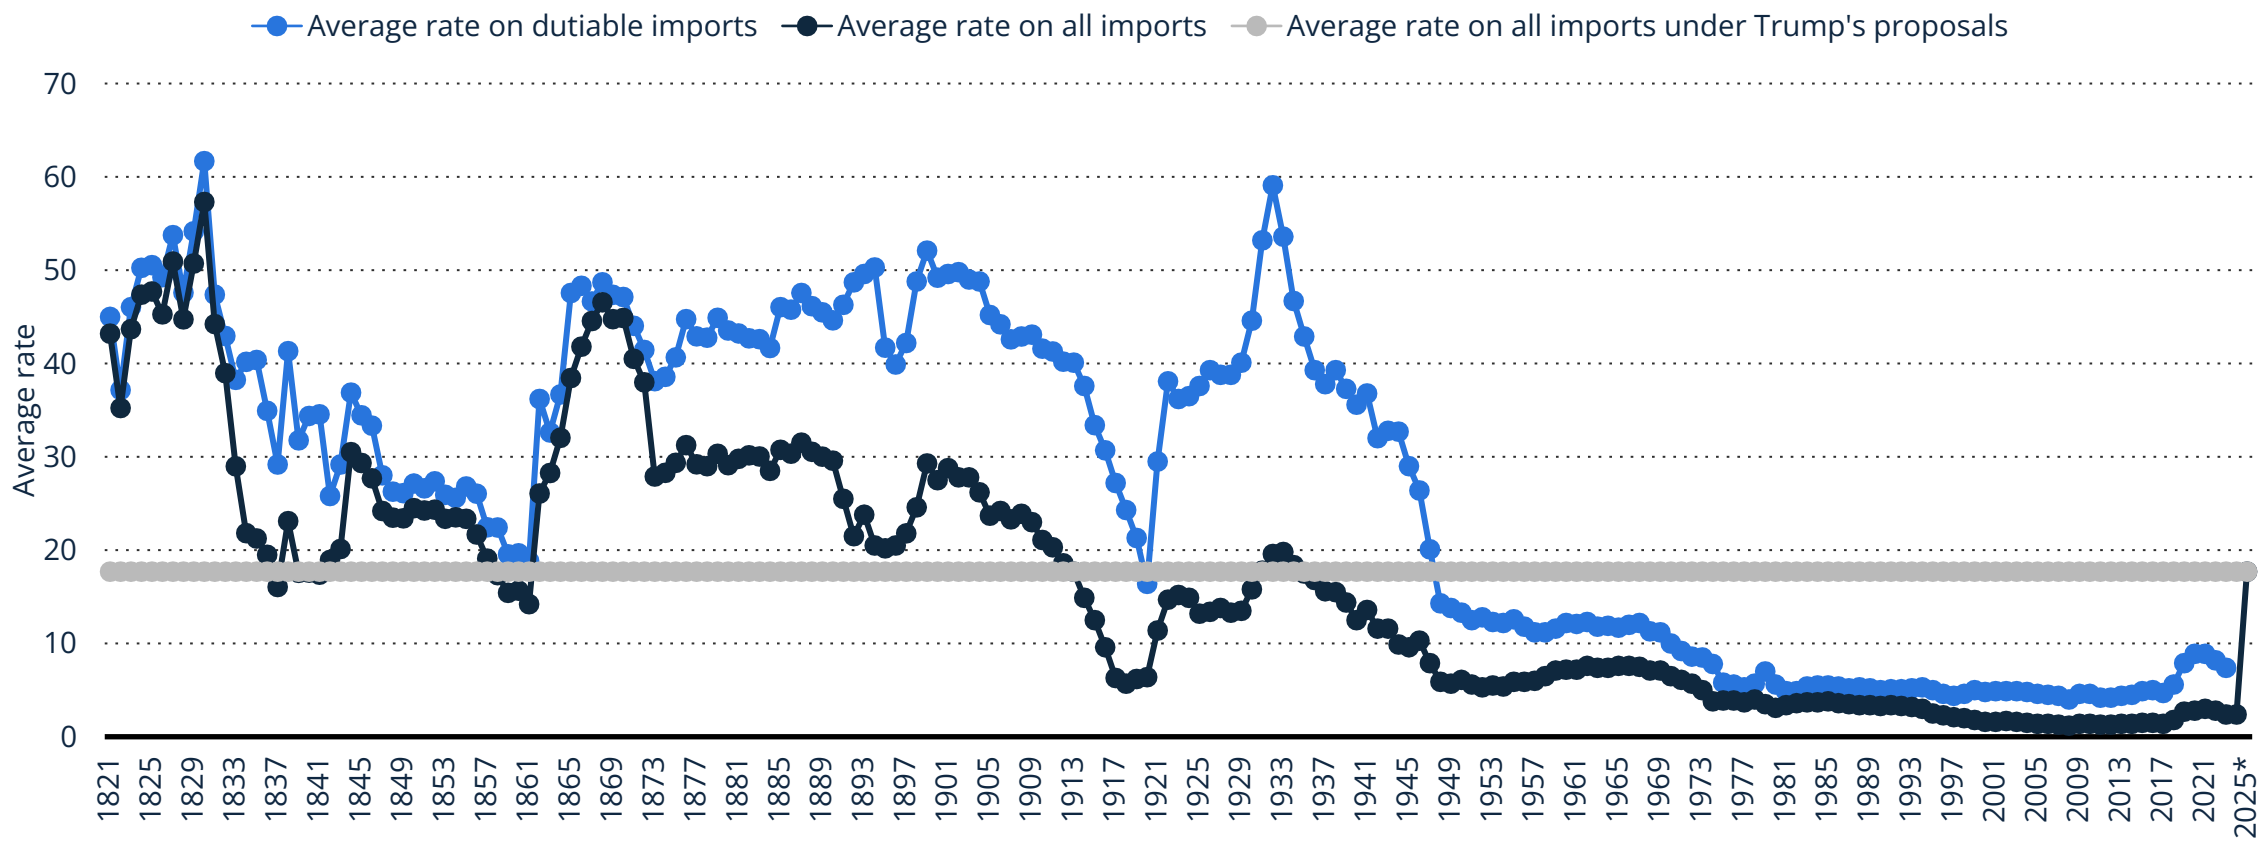
statista

Average tariff rate on all imports and dutiable imports in the United States from 1821 to 2024 and estimated rate for 2025 under Trump's initial proposal

Historical average tariff rate on imports and dutiable imports in the U.S. 1821-2025



Description: President Trump's initial proposals to impose universal trade tariffs, which include tariffs on Chinese, Canadian, and Mexican imports, would considerably increase the average tariff rate. It is estimated that, if put into effect, the average tariff rate including dutiable imports would reach almost 18 percent, up from two percent in 2024.Tariff rates are higher when dutiable imports are included because they refer only to goods that are actually subject to tariffs, rather than all imports. This [...] Read more

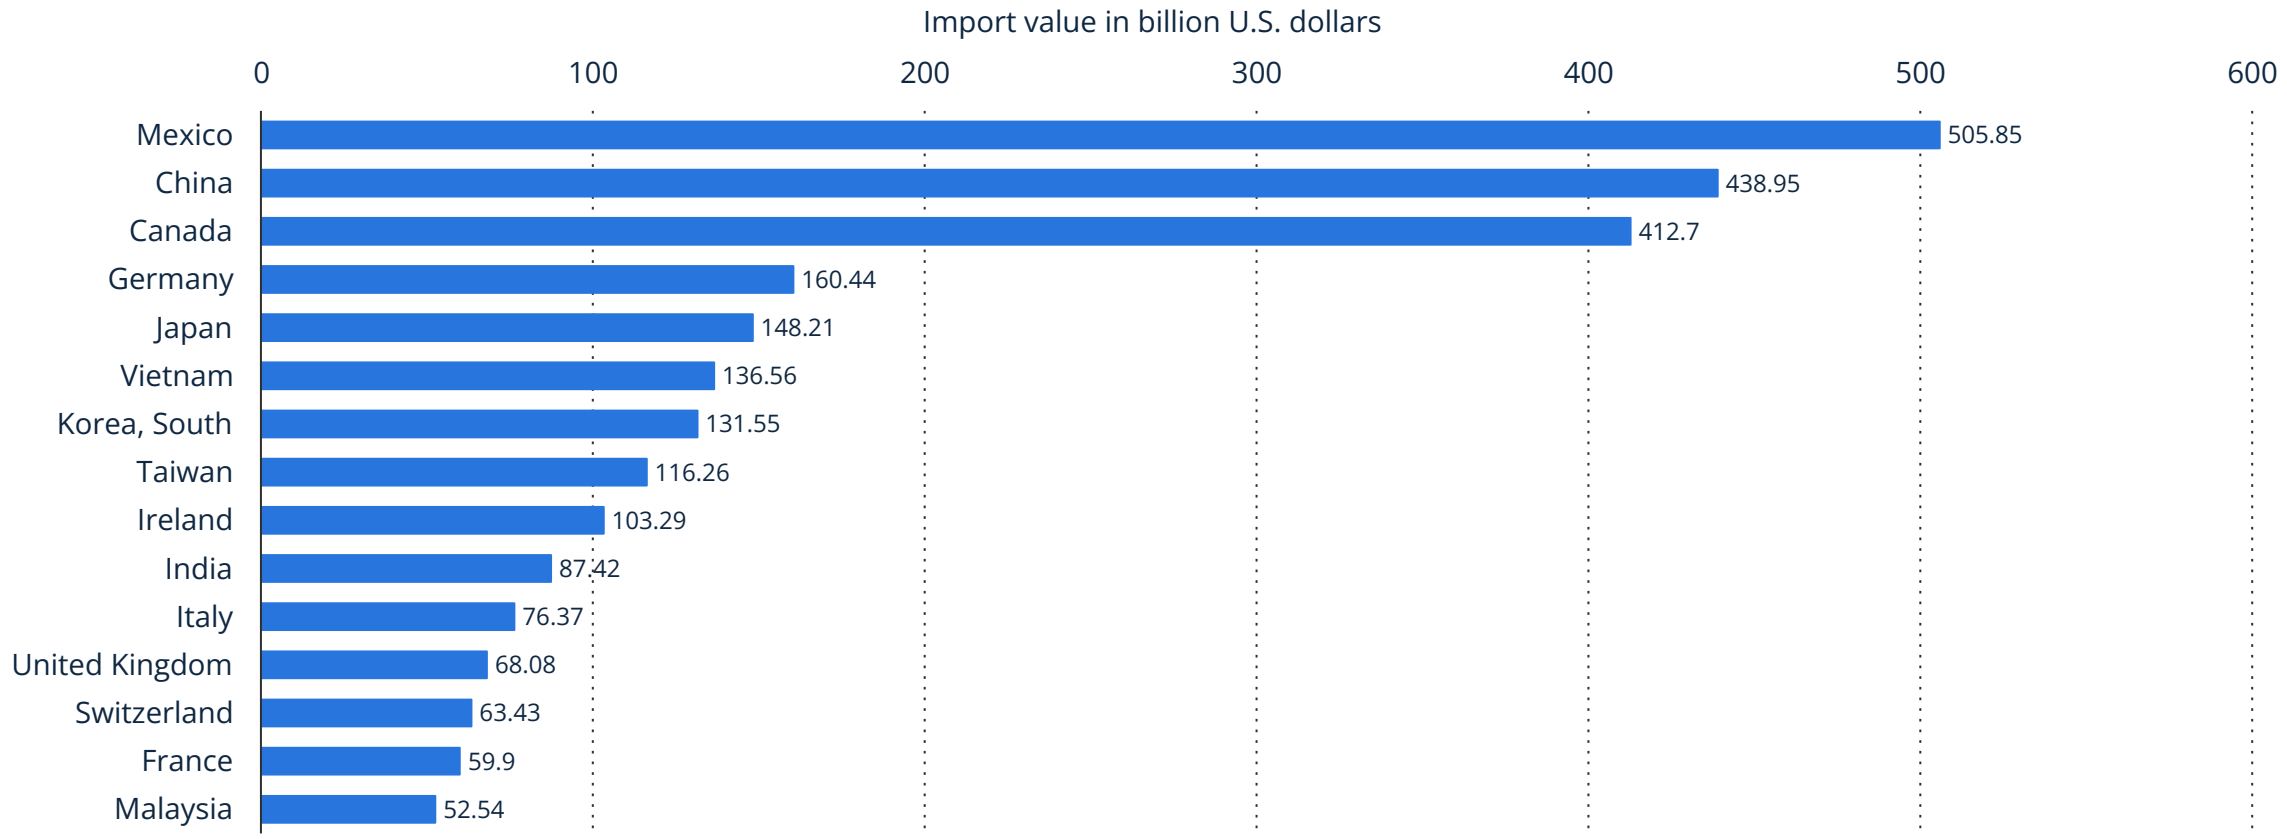
Ranking of the top trading partners of the United States for trade goods in 2024, by import value (in billion U.S. dollars)

U.S. imports - top trading partners 2024



Description: In 2024, Mexico was the top trading partner of the United States based on import value. In that year, U.S. imports from Mexico totaled to 505.85 billion U.S. dollars. China and Canada rounded out the top three as these countries continue to enjoy a close trading relationship under the United States-Mexico-Canada trade agreement. Germany and Japan were also high on the list, both providing the U.S. with over 140 billion dollars worth of imports in 2024. Read more

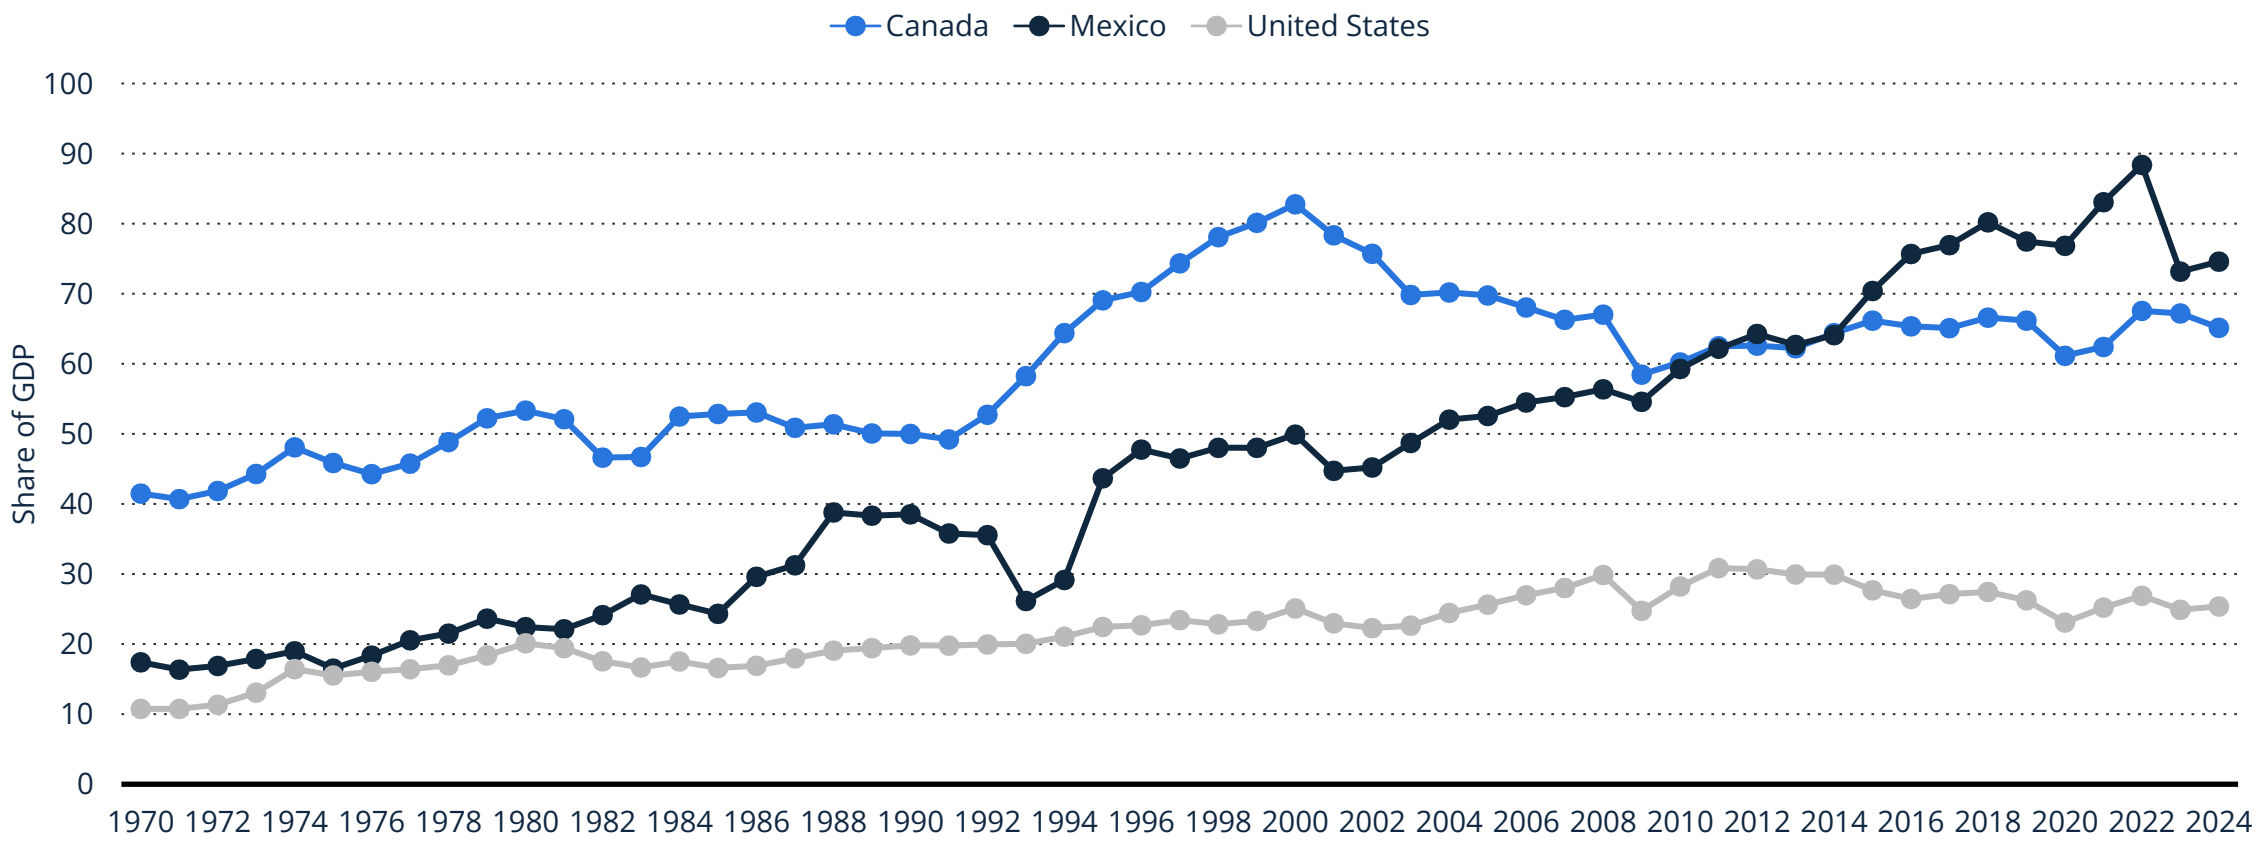
Trade in goods and services as a share of gross domestic product (GDP) in the United States, Canada, and Mexico from 1970 to 2024

International trade as a share of GDP among USMCA members 1970-2024



Description: As of 2024, Mexico and Canada are considerably more reliant on trade than the United States. While trade in goods and services made up over 74.59 percent of Mexico's GDP in 2024, only 25.38 percent of the U.S. GDP is made up by trade. Canada's share of trade to GDP ratio stood at 65.15 percent that year.The U.S.-Mexico-Canada Agreement (USMCA) is a trade deal that replaced NAFTA in 2020. Designed to facilitate free trade in North America, the introduction of new reciprocal tariffs by [...] Read more
